

Technical data sheet

Brume de Hammam

Use:

Fragrances based on essential oils to diffuse into the steam rooms and steam baths

Packaging: bottles of 250, 500 and 1000 ml, cans of 5000ml

Characteristics: appearance: milky white liquid or slightly colored (natural pigments essential oils)

Density: 0.98 1 liter = 0980 kg

Instructions:

- The product is sucked by the perfume pump and mixed with the steam,
- Can be used pure or diluted. it depends on the fineness of the suction of the perfume pump (more the injection is refined, more the product can be used pure and vice versa)
- When the product is diluted, the dilution ratio ranges from 1 part to 1 to 4 parts water,
- The essential oils will be absorbed by the body through the skin and mucous membranes and spread their benefits,
- Use of product will eliminate odors from water vapor,
- Adjust the perfume pump so that injections of product are very close but in small quantities, to keep persistence of smell as regular as possible,
- Perfectly suited for use in steam shower,
- The product can also be vaporised in the cabin when the steam is not equipped with a perfume pump,
- Average consumption for a professional steambath : about a can of 5 liters per week.

Essential oils or perfumes from essential oils available:

eucalyptus, pine, eucalyptus / mint, rosemary, cajeput / lemon, lavender, luxury, elinya, orange, orange blossom, cedar/litsea, Asia, Mediterranean, Orient, Polynesia.
